

MATERIALS TECHNOLOGY DIVISION

No. 5/14/MTD/CRGO-Webinar/2025

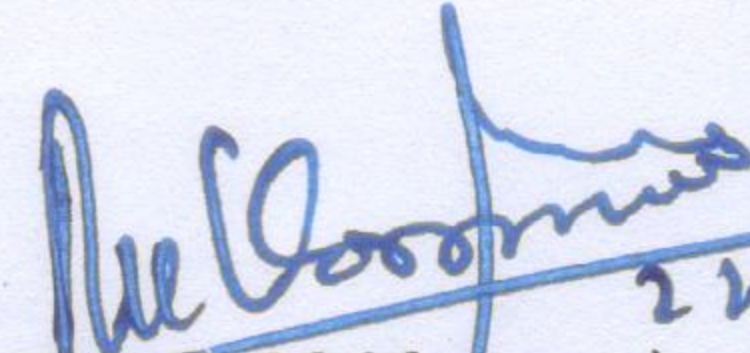

Date: 22.10.2025.

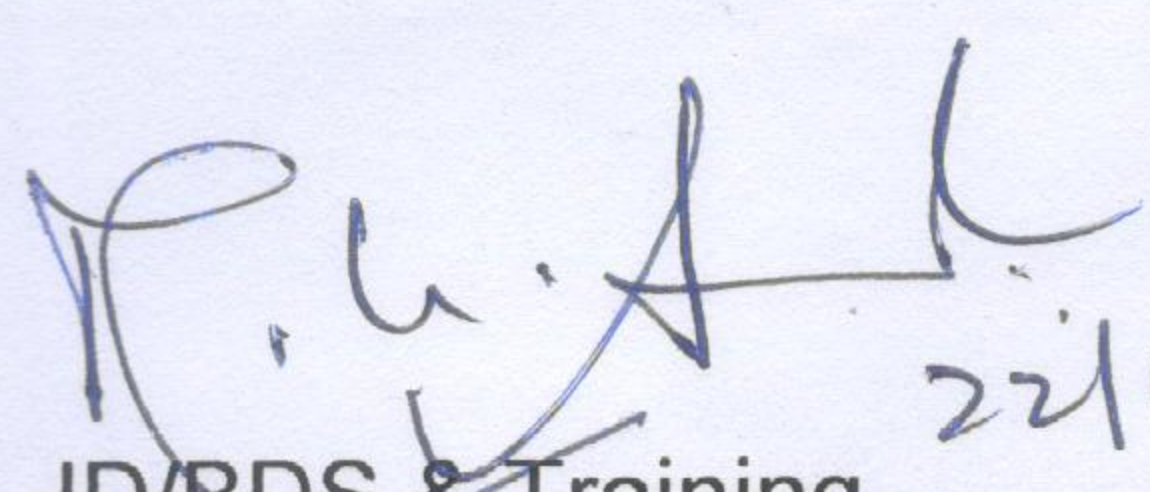

Sub: Webinar during 28th November 2025 on the topic "Significance and Evaluation of CRGO and CRNGO Electrical Steels".

Materials Technology Division is proposed to conduct Webinar on 28th November 2025 on the topic "Significance and Evaluation of CRGO and CRNGO Electrical Steels" at MTD-ONLINE. The Webinar is meant to disseminate the knowledge in the area of materials characterization and electrical steel evaluation methods covering the theory, measurement and qualifying techniques. The participants will get conversant and significance of electrical steel during their service life in the transformers, quality assurance and application criteria of these steels in the electrical equipment.

The Webinar consists of lectures by in-house experts in the field followed by discussions. The aim of the Webinar is to get more clients for CRGO & CRNGO steel lamination testing as per BIS & NABL accreditation. As there is no expenditure involved, it is proposed for **NO REGISTRATION FEE**. All the transformer manufacturers shall be informed by email for the event.

Approval may kindly be accorded for conducting Webinar without any registration fee.
